

Bed to wheelchair

Transfer instructions

Transferring someone safely from a bed to a wheelchair is a common caregiving task that, when done correctly, protects both the individual and the carer. Follow these clear, step-by-step instructions to ensure a smooth and secure transfer.

Position wheelchair next to bed and lock brakes.

Help person sit at edge of bed.

Place transfer belt around person's waist.

Stand close, hold belt and help person stand.

Have them pivot towards wheelchair and gently lower them in the wheelchair.
